Aim

International Conference of Advance Research and Innovation (ICARI-2022) is a premier international conference that aims at current challenges in science and technological advancements with research updates, and innovations that are shaping the future of mankind. This conference

welcomes all scientists, engineers, technocrats, and researchers from all walks of society to share their knowledge and wisdom for exploring solutions to current and future challenges. This platform provides an international forum for researchers to exchange ideas in recent advances on various aspects of theories, analysis, experimentation, and computational methods in science, technology and management, etc.

International Conference of Advance Research and Innovation (ICARI-2022) is devoted to a wide range of subfields in Science and Technology. While it encourages a broad spectrum of contribution in Science and Technology. Articles of interdisciplinary nature are welcome. International Conference of Advance Research and Innovation (ICARI-2022) is a peer-reviewed scientific conference that publishes original articles and research notes in all areas of general studies welcome to well-design and well-documented experimental studies and advanced knowledge in the related subject areas. Manuscripts submitted for publication will be subjected to single-blind peer-review and assessed for their contribution to the scientific understanding of Science and Technology. Work resulting in fundamental insights that benefit our society, is relevant to the conference.

International Conference of Advance Research and Engineering is an interdisciplinary conference with interfaces to other branches of Engineering, Science, and Technology as well as with Applied Science and Applied Economics. ICARI-2022 publishes manuscripts on research, development, and design related to science and technology in Mechanical Engineering. It accepts manuscripts in different formats as- Full Length Articles, Review Articles, Book Reviews, etc.

Area of Interest

It is an **interdisciplinary conference**, which includes all areas of Science and Technology. Innovative original research papers on topics covered under the following broad areas (but not limited to).

ICARI-2022 aims to provide an interface between Mechanical engineering vis a vis other branches of engineering along with scientific principles and applied mathematics. ICARI-2022, vet manuscripts through the prism of Mechanical Engineering while the spectrum might include innovative research, development and design related to science and technology in mechanical and vehicle engineering. Automation, Statistics, Static, and Dynamic, vibration, Sound, Chemical, metallurgical, materials and technology, Civil and Fluid Engineering, Solid Mechanics and Design, Production and Industrial Engineering, Thermal and Power Engineering, Micro/Nano Technology, Robotics, and Control, Computer and Software Science, Optical and Instrument Science, Bio-Mechanics, Biotechnology, Energy, Environment and Sustainability, Management Science, etc.

Prospective authors may submit manuscript by E-mail address, as **doc file** attachments to:
